

RBT-95 - Ribbon Tweeter

60
W MAX

Ribbon tweeter, 30 W, 8 Ohm

- Magnetostatic speakers of a high efficiency
- Perfectly fine dynamic reproduction of the high frequencies and the brilliance frequency range
- Power capability of the system can considerably be increased by voltage dividers and maybe higher crossover frequencies (level attenuations which take tweeters to the level of normal hi-fi systems)
- Very light sound of low distortion which particularly improves the stereophony in applications from 5 kHz on
- By adding a super tweeter above 8-10 kHz, e.g. even high-quality full range systems can be further improved
